

The AUTOSOFT Manual Water Softener

Available as
AS8 (8 litres) and AS12 (12 litres)

The traditional basic way to provide soft water to supply and protect a range catering equipment, such as coffee machines, dish/glasswashing machines, ice making machines, steam oven. Not only protects equipment by preventing lime scale build-up on heaters, thermostats, etc. and in boilers, which would cause corrosion and premature failure of such parts, but enhance the economy, efficiency and performance of detergents. Thousands of such softeners are in use daily throughout Europe.

Simple weekly or twice-weekly regeneration process which takes a matter of minutes to perform.

Dimensions:

AS8	AS12
H - 420mm	H - 500 mm
ø - 185 mm	ø - 185 mm

Typical use with
glasswashing
machines
