detergent**

CRYSTAL ORIGINAL

**ORIGINAL ALKALINE CABINET GLASSWASHING
DETERGENT FOR ECONOMICAL MANUAL DOSING OR
TIMED & PULSED AUTOMATIC DOSING; EFFECTIVE AND
BACTERICIDAL.**

Health & Safety information to be found in Product Data Sheet,
either enclosed in carton or available separately.

INSTRUCTIONS for MANUAL Dosing:

With "Pelican" dispenser attached to container, or feed tube of fixed plunger
dispenser in detergent container, charge wash tank of glasswashing machine
with 2 or 3 units of CRYSTAL ORIGINAL. Allow the machine to heat up
before commencing first wash cycle. At the end of the wash cycle, observe
the condition of the wash solution (in the wash tank). If a stable foam, add 1
or 2 units of detergent. Observe again at the end of the next wash cycle and
continue to add detergent until virtually no bubbles are evident - the wash
solution should appear virtually "dead"; but clean.

CRYSTAL ORIGINAL is a highly sophisticated blend of constituents
including bactericides, sequestrants, buffers, a corrosion inhibitor and tannin
remover; but containing no caustic soda. Because of these, CRYSTAL
ORIGINAL will actually protect all the machine's metal and moving parts; it
will not degrade glass as other, less sophisticated products are wont to do.

If used as instructed, CRYSTAL ORIGINAL will produce spectacular wash
results in conditions of soft or softened water at 55°C, particularly if used in
combination with its partner product, FINESSE G rinse additive. Containing
bactericides, it will kill brew-product residue and humanly transmitted
bacteria. Yeast mould deposits (generally evident under the rim) and lipstick
traces are consigned to history.

5 Litres

CRYSTAL ORIGINAL is manufactured by: CHEMISPHERE UK Ltd, of
Unit 4 . No. 3 Richmond Road . Trafford Park . MANCHESTER, M17 1RE
Tel: 00 44 (0) 1536 518 062 Fax: 00 44 (0) 1536 411 210

For as little as

€10 per 5 litres
